connection box.

Customised. Weatherproof. Mining Standards tough. Box-it solutions by qub are Australia's premium quality enclosure choice for electrical, instrumentation, communications or pneumatics.

**More than a product – it's a concept that's changing everything.**

### Setting the standard

Box-it solutions by qub are engineered to meet stringent mining industry standards – there's simply no tougher enclosure at a comparable price.

### A tough case with flexible advantages

Box-it designs can be customised to virtually any application.

### Hard and fast – order online and have it despatched in 30 days or less

Visit the Box-it website and click through a simple menu to select a design and dimension that best suits your needs. Once purchased, we'll have it despatched to you in less than 30 days.

### Everything simply fits

Box-it solutions are designed to accept standard modular electrical components, so you're assured of a perfect fit and a professional finish every time.

### No-compromise components

From its chassis down to every last component. Every Box-it solution is premium quality for performance and durability in the very toughest of conditions.

- SS316 handles
- IP66 certified

- Padlockable handles
- Door stay fitted standard
- Broad range of chassis including ISOBAR
- Two screw bar links
- Lockable CB/devices\*

\* Subject to equipment specifications.

## Custom design and order online

Australia's most streamlined industrial enclosure concept

- Visit [www.boxitsolutions.com.au](http://www.boxitsolutions.com.au)
- Click through the simple menu of sizes and specifications
- Complete your order
- Have your Box-It designs despatched in 30 days or less.

### Substation networks

Box-it solutions are at work 24-hours a day in both metro and rural sub-stations. When safety depends on a system's protection from weather and incidental damage, there is no better protection that Box-it.

### Performing in the mining industry

Box-it solutions are currently in use at mining sites on Eyre Peninsula, Roxby Downs, Adelaide. Used to house electrical components as well as specialist instrumentation. Box-it solutions continue to perform faultlessly in some of Australia's most remote and aggressive conditions.

*"At MPS we continue to be very impressed with the Box-it solutions concept. Ordering is streamlined and simple, delivery is always prompt and the enclosures themselves are well thought-out and remarkably tough. Box-it solutions take the hassle out of enclosure design and once in place, we can be confident that they will take many years of hard knocks and bad weather without letting us down."*
